

# Approximation and interpolation of simple and complex functions

Nicola Seriani

[nseriani@ictp.it](mailto:nseriani@ictp.it)

The Abdus Salam International Centre for Theoretical Physics,  
Strada Costiera 11, 34151 Trieste, Italy

# Outline

- Interpolation and errors: linear, spline
- Approximation: Taylor, Pade`
- Lookup table plus Newton-Raphson
- Range reduction
- Fast inverse square root

Throughout we will talk about

- ❖ Cost of interpolation vs. explicit function evaluation
- ❖ Floating-point math tricks
